

JOB DESCRIPTION DELIVERY LEAD

DL

The Delivery lead (DL) manage the projects from ideation to rollout. The DL would proactively participate in all steps of user experience design & implementation to provide early feedback and ensure alignment with all squad members, working closely with Digital Banking, Web Management Digital Marketing and Products team to implement execute Web optimization capabilities which drive measurable lift on digital business goals. The role requires proven leadership, outstanding stakeholder management and in-depth technical knowledge of Web management. Strong knowledge of Web development is a pre-requisite, with deep hands-on experience with HTML5 / CSS3 / Vanilla Javascript / jQuery and W3C standards. It entails significant complexity and scale in terms of designing, implementing and optimizing customer interactions, working closely with the SEO, Marketing, Analytics, IT, Products on improving Onsite performance and conversion.

The DL will co-lead the vision and implementation of Onsite optimization strategy along with the Test Lead and the SEO Lead, working amongst a cross-functional team in ideating Web optimization initiatives, prioritizing & conducting rapid tests. The Front End Developer will be ultimately responsible for activation and operationalization of each Onsite improvement initiative, with delivery of the test and learn programme across the Website. Ultimately, he will act as a facilitator and connector between core team members of the cross-functional agile squad and external stakeholders who manage key marketing technology platforms.

Key Roles & Responsibilities

- Work with the team to create responsive web pages by converting wireframes/ designs (PSDs) to HTML/email templates; apply styling elements utilizing HTML, CSS, & JavaScript to web properties
- Track the performance of the tests, continuously optimize them and propose ideas for further optimization
- Audit and troubleshoot our web pages (using automated audit tools/manual updates) and develop roadmap to help implement required changes
- Maintain, manage and update a functional, easy-to-use and up-to-date website
- Manage and continuously optimize the performance of the website (e.g. for SEO and conversion), continuously driving toward a best-in-class onsite experience
- Measure the performance of current and new user journeys and optimize them in the light of measurement data
- Continually drive toward a best-in-class website experience through ongoing website optimization leveraging analytics
- Work with the team to Develop new web pages, landing pages and microsites as required
- Work with the team to Develop custom mark-up suitable to be integrated into pages via A/B testing platforms like Adobe Target
- Ability to understand and debug JavaScript tags for martech and adtech platforms – typically via tag management platforms
- Ideate over web/email designs with UX designers and provide user experience feedback to enrich the recommended design
- Work with a variety of stakeholders, e.g., Scrum master, UX designers and back-end developers to align on and accomplish deliverables
- Assist with content development and information architecture
- Works closely with IT to align on development tools & methodologies
- Collaborate with a range of partners, e.g., Web Management, Online/Mobile platforms, Digital Banking, Digital Marketing, Marketing agencies, Legal, Compliance, Security
- Own interaction points with members of core team (e.g., test lead, digital marketing specialist, copywriter, analytics specialist, product specialist) and any other relevant stakeholders to get web updates done
- Read business requirements and turn them into technical implementation
- Act as “air traffic control” for Web channel – has strong understanding of Web and other digital channels
- Engage with data analytics to assess & report test performance and projections
- Manage dependencies and efficiently communicate plans, issues and results with senior management on a proactive and regular basis
- Effectively manage priorities and backlog, and communicate workload, status and timelines with stakeholders
- Ensure that a compliance focus is embedded across the website and that regulatory requirements are satisfied while risks are mitigated and addressed
- Display awareness and understanding of the Operational Risk Framework for Retail Banking
- Display awareness and understanding of the regulatory framework, in which the Group operates, and the regulatory requirements and expectations relevant to the role

Qualifications & Skills Required

- Minimum of 5+ years of professional experience as Web Master in creating web pages for a large scale brand with multi lingual websites. Experience of working in Agile project team a big plus
- Bachelor's Degree required; graduate degree preferred; BSc/BA in Computer Science, Design or a related field is preferred
- Knowledge in HTML5 / CSS3 / Vanilla Javascript / jQuery and W3C standards
- Knowledge in Web performance, Accessibility and Standards - strong grip of (W3C) standards
- Knowledge in WordPress development and content publishing
- Working knowledge of testing and deployment approach
- Working knowledge of website management tools
- Experience with Adobe Analytics, Adobe Target, Adobe Launch and Google Analytics / Google Tag Manager is a strong plus
- Experience in conducting competitor and customer analysis
- Understanding of coding principles such as Object oriented programming preferred
- Deep understanding of SEO concepts and implementation in web development
- Fluency in Cantonese and English
- Exceptional troubleshooting skills and should thrive in high expectation scenario with many stakeholders
- Efficient and confident communicator with very strong relationship building skills
- Energy and desire to succeed; follows through on commitments; pushes self and others to deliver exceptional results
- Strong collaboration, consensus building, problem resolution and communication skills are a prerequisite
- Understanding of the issues related to the decision-making process; ability to analyze situations fully and accurately, and reach productive decisions
- Experience in banking projects is a plus
